CG-MAX

3" Max Efficiency Wheel

Introducing the Next Big Wheel

Meet the newest CG-MAX® wheel, built to move more, with less effort. Designed for heavy loads, it delivers smooth, controlled performance over debris, reduces noise, and protects flooring. Confident grip and toughness make it ideal for both manual and towline applications.

At its core, advanced polyurethane technology absorbs weight over time, maintaining performance under continuous load. The result is a heavy-duty solution that's as versatile as it is dependable, built to handle demanding environments without compromise.

Tread Profile Options

TEMPERATURE RANGE: -40°F to 180°F

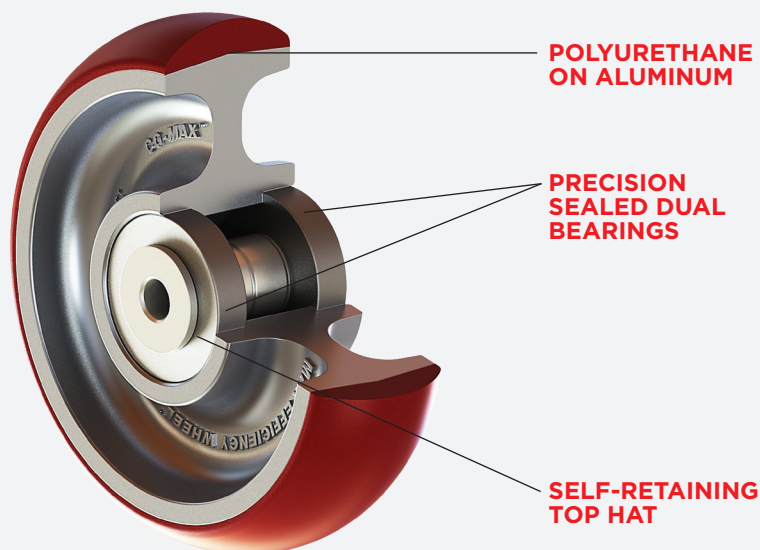

AVAILABLE DUROMETER: 85A

AVAILABLE WHEEL DIAMETERS: 6", 8", 10", 12"

THREAD WIDTH: 3"

CG-MAX wheels can be purchased alone or in one of our trusted heavy duty caster solutions like our 310 and 410 Series

Features

Wheel Part Number

Diameter	Profile	Capacity	Part Number
6"	Round	2000lbs	AX0652812MAX
6"	Crown	2600lbs	AK0652812MAX
8"	Round	2500lbs	AX0852812MAX
8"	Crown	3100lbs	AK0852812MAX
10"	Round	4800lbs	AX1052812MAX
10"	Crown	5200lbs	AK1052812MAX
12"	Round	4900lbs	AX1252812MAX
12"	Crown	5300lbs	AK1252812MAX

All CG Max 3" Wide Wheels have a hub length of 3½" and fit a ¾" axle

Applications

- Automotive Manufacturing and Assembly Plants
- Aerospace & Defense Ground Support Equipment (GSE)
- Material Handling (Floor-Sensitive)
- Robotics, AGVs and Automated Carts
